

Author contributions:

According to the Uniform Requirements for Manuscripts Submitted to Biomedical Journals and the guidelines of the International Committee of Medical Journal Editors (ICMJE), designation as an author must satisfy four conditions. The author must have:

1. Contributed substantially to the conception and design of the study, the acquisition of data, or the analysis and interpretation
2. Drafted or provided critical revision of the article
3. Provided final approval of the version to publish
4. Agreed to be accountable for all aspects of the work in ensuring that questions related to the accuracy or integrity of any part of the work are appropriately investigated and resolved.

Sample of author contributions:**Sample 1:**

E.C., M.S.M., S.M.A.S.; Participated in study design, data collection and evaluation, drafting and statistical analysis. M.H.N.E., E.C.; Performed follicle collection and prepared oocytes for ICSI pertaining to this component of the study. E.C., M.S.M., M.H.N.E.; Contributed extensively in interpretation of the data and the conclusion. B.A., E.C.; Conducted molecular experiments and RT-qPCR analysis. All authors performed editing and approving the final version of this paper for submission, also participated in the finalization of the manuscript and approved the final draft.

Sample 2:

H.A., M.M.T., M.A.K.; Contributed to conception and design. A.M.S.; Contributed to all experimental work, data and statistical analysis, and interpretation of data. M.A.K.,A.T.; Were responsible for overall supervision. A.M.S.; Drafted the manuscript, which was revised by H.A. and M.A.K. All authors read and approved the final manuscript.
